SUMMARY

Result-driven computer science student from Jaypee Institute of Information Technology who is passionate about developing user-friendly software applications. With excellent problem-solving skills and a great team player. Ready to develop products as a software engineer. Learning and improving new skills to become a better coder.

WORK EXPERIENCE

EDUFUSE PRIVATE LIMITED (Software Developer Intern) Oct 2022 - current

I am closely working with the IIT Patna team on their proposed Academic Portal. During this internship, I will be working on NodeJs, ReactJs, POSTGRESQL and MongoDB.

TechRupt Innovations (Front-End Developer) Apr 2022 - Apr 2022

– I was making website for their client using ReactJs.

PROJECTS

Buffer

[Link to Demo](#)

It is a full stack website made with ReactJs, NodeJs, Express, MongoDB. This website is a eCommerce for chemical industries. Its like one industry want goods that other industry make. We are trying to connect industries.

MovieWatcher

[Link to Demo](#)

This project uses TMdB api. And used redux for state management and axios for api calling. In this you can get various options like Trending, comedy, drama, thriller etc. With their details when they get selected.

ACHIEVEMENTS

Smart India Hackathon 2022 - Winner

My Team *Spam_Bytes* participated in Smart India Hackathon that is India's biggest hackathon. We made a project named as eBuddy against child-Labour. It makes easy to register a complaint (under 1min) and as soon as you file a complaint automated call system generates a call to registered mobile number of the local authority.
